1. Quercus robur, (it is on council land) - Prune branch overhanging driveway to the nearest growth point and lower hanging further protruding branches reduced by 1.5m (or to the nearest viable growth point). I would like to prune the overhanging branch as it has potential to cause damage to cars if it were to fall and the lower branches as these are causing a nuisance with birds defecting on parked cars. The tree appears to be in relatively good health, however I have identified that the branch that I would like to prune is in poor health (on the basis of localised epicormic growth), and shows signs of previous pruning (previously reduced leaving sapwood and heartwood exposed). The pruning will be carried out in accordance with BS3998, and the waste product will be used to create a habitat stack.

1. T1. Oak tree on back boundary (Hart District Council Tree) - Reduce 2.5m in height with a finish height of 16-16.5m. Reduce eastern side by 3m at its widest point and Western side by 2m to leave a more balanced crown and a radial spread of 6m approx. This will give the resident more light levels to property.

23/00784/TPO – 31 March 2023 - Officer: Officer: Locum Tree Consultant

1. Crab Apple (Malus sylvestris) T1 - Fell to allow for new driveway. We would like to completely remove the tree and also the lawn to install a block driveway. We cannot do this without the removal of the tree. We do not plan to replace the tree as there will be no location to plant a new tree. We have plants and bushes around the front which will still contribute to the look and feel of the area. We also have several bushes and one tree in our back garden.
